PRODUCT SPEC SHEET

Sharp / SJWF200

Refrigerator Water Filter

Take a sip of water and relax as the SJWF200 water filter reduce impurities found in common tap water. Designed for owners of the Sharp French 4-Door Counter-Depth Refrigerator with Water Dispenser (SJG2254FS), this carbon-based replacement filter removes select odors and the taste of chlorine for smoother drinking. The SJWF200 water filter for Sharp SJG2254FS Refrigerators is tested and certified by NSF International Against NSF/ANSI standards 42 and 53. It is recommended that you replace your water filter every 6 months or 200 gallons, whichever comes first. Over time, your water filter will collect filtered-out particles and contaminants that will naturally make it less effective. Enjoy fresh tasting water right from the refrigerator with this water filter.
