INSTALLATION INSTRUCTIONS FOR WALL MOUNTED DRYER KIT WMK-35

THIS KIT CONSISTS OF THE FOLLOWING:	DRYER REQUIREMENTS
1 WALL MOUNTING BRACKET 2 BOTTOM BRACKETS 6 ¼ x 3 INCH WOOD SCREWS 7 ¼ x 1½ INCH WOOD SCREWS 12 WASHERS	Carefully read and follow individual dryer installation instructions for exhausting requirements.

GENERAL INFORMATION:

The back of the dryer is not accessible for service or maintenance after dryer mounting installation is complete. It is recommended that the dryer be checked and electrical installation completed prior to mounting. For service or maintenance requiring rear access, the dryer must be removed from the wall.

CAUTION: DISCONNECT ELECTRICAL CURRENT BEFORE INSTALLING OR SERVICING DRYER.

The electrical outlet must be located above the dryer, or beside the dryer if adequate dryer-to-wall clearance is available. The outlet must be within three feet on a 240 volt dryer or a 120 volt dryer from the service cord entry on the rear of the dryer.

CAUTION
The 120 volt receptacle on the back of the 240 volt dryer must not be used with this wall mount kit.

DRYER MOUNTING POSITION

These instructions explain two mounting positions for your 24 inch dryer. Position A (figure 1-A) is for use with portable washer and position B (figure 1-B) is for use with bifold lid washer.

INSTALLATION PROCEDURE:

1. Obtain two pieces of 2x4 long enough to span at least two wall studs and the width of the dryer.
2. Locate wall stud center lines. Mark wall stud center lines on two pieces of 2x4 in relationship to position dryer is to be mounted.
3. Referring to figure 1-A or 1-B, draw a horizontal reference line (67" or 73") from floor to locate upper 2x4 support.

4. Position, level and secure upper 2×4 with four ¼ × 3 inch wood screws. The bottom of the 2×4 should be positioned on reference line.
5. Referring to figure 1-A or 1-B, draw a horizontal reference line 32" down from the bottom of the upper 2×4 support.
6. Position, level and secure lower 2×4 with two ¼ × 3 inch wood screws. The center line of the 2×4 should be positioned on reference line.
7. Referring to figure 2, mount the metal wall bracket ⅛ inch from the bottom of the upper 2×4 support with five 1½ inch wood screws.
8. Referring to figure 3, remove one screw from each lower rear corner of dryer and, using same screws, secure lower brackets (supplied) as shown.
9. Dryer is supplied with exhaust at the top, locate and install outside exhaust duct referring to figure 1-A or 1-B. For other optional exhaust directions as shown in fig. 1-A or 1-B (rear and sides) refer to dryer installation instruction sheet.
10. Position the dryer on the wall mounting bracket and check that the dryer is leveled.
11. If the dryer needs leveling, use some of the twelve washers supplied with the kit as spacers behind lower brackets of figure 3 and secure the dryer to the lower 2×4 support using the remaining 1½ inch wood screws.
