DIMENSIONS AND INSTALLATION INFORMATION

30" double electric wall ovens are approved for installation above 27" and 30" warming drawers.

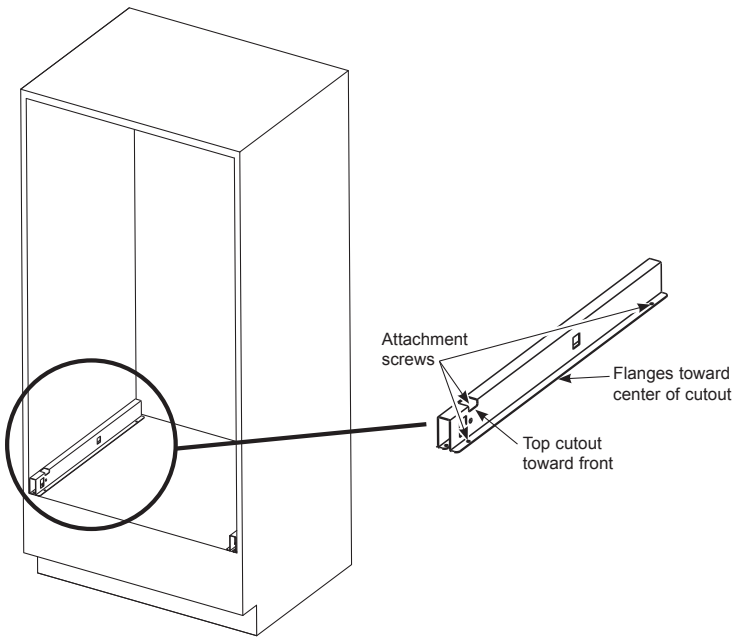

WHEN TO USE THE PEDESTAL RAILS: When replacing an older GE Appliances 30" double wall oven with a new GE Appliances model. Cutout height = 51-1/16" to 52-15/16". This is our traditional cutout height.

WHEN NOT TO USE THE PEDESTAL RAILS: When replacing a 30" double wall oven from another manufacturer (i.e., Whirlpool) with a new GE Appliances model. Cutout height = 50-1/4". You will need to verify that the existing cutout matches the 50-1/4" dimension.

If the new GE Appliances 30" double wall oven is being installed into new construction (i.e., not a replacement), then the recommended installation is to use the pedestal rails.

ATTENTION INSTALLER: Electric wall ovens are NOT approved for installation with a plug and receptacle. They must be hard wired into an approved junction box.

IMPORTANT: Before installing, consult installation instructions packed with ALL products for current dimensional and combination data.
