(12' ceiling height with optional high celling kit UX12DC9SLSS)
(14' ceiling height with optional high celling kit UX14DC9SLSS)

The vent hood must be installed 24" min. above the cooking surface. For optimal performance, installing the hood more than 36" above the cooking surface is not recommended. The hood installation height above the cooking surface depends upon ceiling height. The telescopic duct cover conceals the ductwork running from the top of the hood to the ceiling.

NOTE: Installation height should be measured from the cooking surface to the lowest part of the hood. This hood may be installed onto a wall and vented to the outdoors, or it can be installed for recirculating operation. Parts for recirculating operation are supplied with the hood.
