DIMENSIONS AND INSTALLATION INFORMATION

Prepare the opening: The Advantium Built-In Oven can be installed in combination with other appliances. Always follow each product's Installation Instructions to compete the installation.

Single oven installation: Order a 30" wide single oven cabinet or cut the opening in a wall to the dimensions shown.

* For existing cutouts, a maximum width of 28-1/2" is acceptable. If the opening is slightly wider, secure a furring strip on each side of the cutout for securing the oven.

- Always maintain 36-3/4" minimum height from the floor to the cutout in any single or combined installation.
- The unit overlap on the top is 1–3/4" but allow 1–7/8" clearance from top edge of cutout. The unit overlap on each side is 2–1/4" but allow 2–3/8" clearance from side edges of cutout. The unit overlap on the bottom is 1" but allow 1–1/8" clearance from bottom edge of cutout.
- Oven overlaps will conceal cut edges on all sides of the opening.

Preparation with a Warming Drawer

When installed over a single oven or a warming drawer, allow at least 2" between the two openings. This separation will provide clearance for bottom overlap of the Advantium Built-In Oven and the other appliance overlaps.

Construct a solid oven floor of 3/8" min. thick plywood supported by 2 x 4 or 2 x 2 runners on all sides.

- the support must be level and rigidly mounted, flush with the bottom edge of the cutout.

* For existing cutouts, a maximum width of 28-1/2" is acceptable. If the opening is slightly wider, secure a furring strip on each side of the cutout for securing the oven.

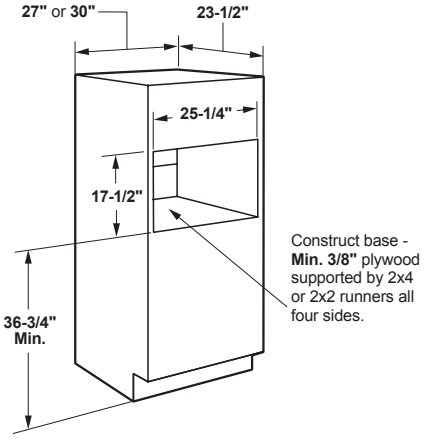

Note: Additional clearances between the cutouts may be required. Check to be sure the oven supports above the Warming Drawer location do not obstruct the required interior depth and height. See Warming Drawer installation instructions for details.

Installation Over a Wall Oven and Warming Drawer:

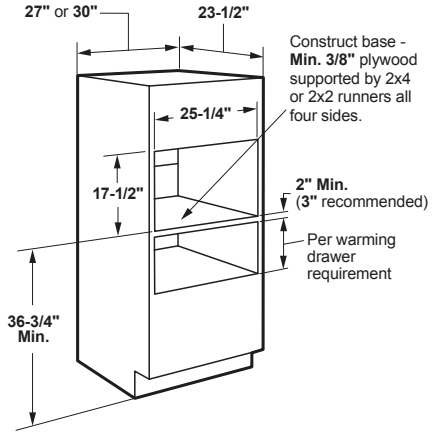

* For existing cutouts, a maximum width of 28-1/2" is acceptable. If the opening is slightly wider, secure a furring strip on each side of the cutout for securing the oven.
