HTX26EASWWW

Hotpoint® 6.2 Cu. Ft. Capacity Electric Dryer with up to 120 Ft. Venting and Shallow Depth

DRYER DIMENSIONS (IN INCHES)

EXHAUST OPTIONS: 4-way via rear, right, left and bottom.

CIRCUIT REQUIREMENTS: An individual, properly-grounded branch circuit, protected by a 30-amp circuit breaker or a time-delay fuse, is required.

ELECTRIC DRYER RATING: 240V, 5600W, 60Hz, 24 Amp, 208V, 4400W, 60Hz, 22 Amp

INSTALLATION INFORMATION: For complete information, see installation instructions packed with product for current dimensional data.

SPECIAL INSTALLATION REQUIREMENTS
ALCOVE OR CLOSET INSTALLATION:

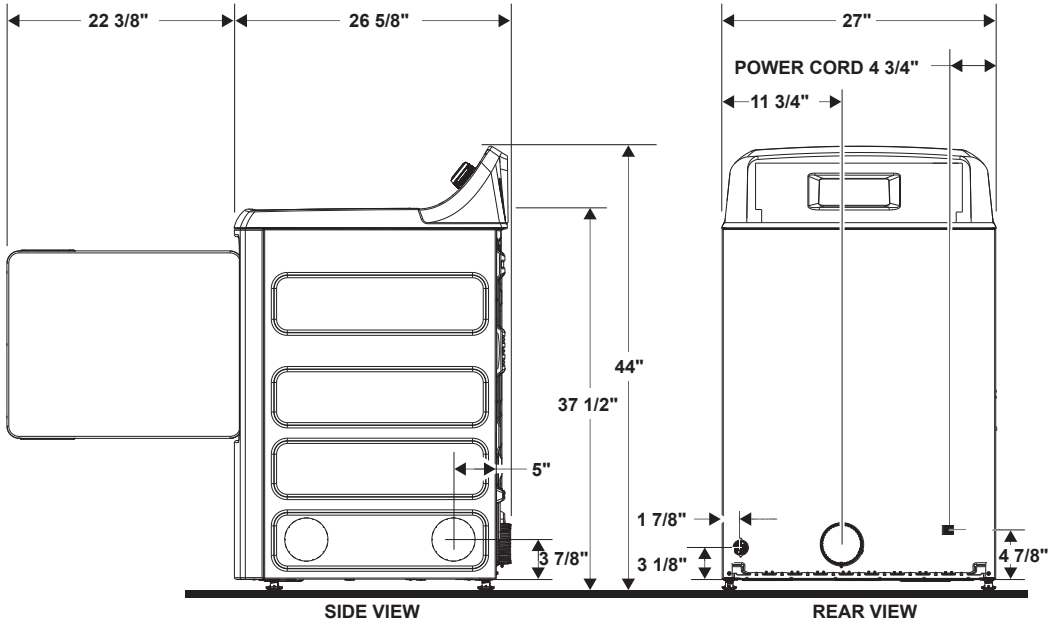

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer MUST be exhausted to the outside.
- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are: 0” both sides, 0” rear and 1” top.
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.

BATHROOM OR BEDROOM INSTALLATION:

- The dryer MUST be exhausted to the outdoors.
- The installation must conform with the local codes, or in the absence of local codes, with the National Electric Code and National Fuel Gas Code, ANSI Z223 for gas dryers.

MINIMUM CLEARANCES OTHER THAN ALCOVE OR CLOSET INSTALLATION:

Minimum clearances to combustible surfaces: 0″ both sides, 1″ rear.

POWER CORDS: GE Appliances strongly recommends the use of factory specified parts. Select the power cord to fit your installaton requirements.*
NOTE: If the dryer circuit is on a circuit protected by a GFCI breaker, then 3-wire installation is not permitted. Hose wiring and dryer must be configured for 4-wire.

Part Number	Type	Length	Amperage
WX9X2	3-Prong	4 Feet	30
WX9X3	3-Prong	5 Feet	30
WX9X4	3-Prong	6 Feet	30
WX9X18	4-Prong	4 Feet	30
WX9X19	4-Prong	5 Feet	30
WX9X20	4-Prong	6 Feet	30

Specification Revised 9/25

HTX26EASWWW

Hotpoint® 6.2 Cu. Ft. Capacity Electric Dryer with up to 120 Ft. Venting and Shallow Depth

For complete information, see installation instructions packed with your dryer.

DUCTING MATERIALS:
For best performance, this dryer should be vented with 4″ diameter all-rigid metal exhaust duct. If rigid metal duct cannot be used, then UL-listed flexible metal (semi-rigid) ducting can be used (Kit WX08X10077). In special installations, it may be necessary to connect the dryer to the house vent using a flexible metal (foil-type) duct. A UL-listed flexible metal (foil-type) duct may be used ONLY in installations where rigid metal or flexible metal (semi-rigid) ducting cannot be used AND where a 4″ diameter can be maintained throughout the entire length of the transition duct. Please see installation instruction packed with your dryer for complete instructions when using flexible metal (foil-type) ducting.

EXHAUST LENGTH CALCULATION:

1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
2. The maximum length of 4′ rigid (aluminum or galvanized) duct which can be tolerated is shown in the table. A turn of 45° or less may be ignored.

   Two 45° turns within the duct length should be treated as a 90° elbow. A turn over 45° should be treated as a 90° elbow.

Dryers MUST be exhausted to the outside.

CAUTION: For personal safety, do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard. Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12″ above the ground or any other obstruction with the opening pointed down.

ACCESSORIES*

GE Part Number	Description
WX09X10002	4′ 30 Amp. 3-Wire Dryer Cord
WX09X10003	5′ 30 Amp, 3-Wire Dryer Cord
WX09X10004	6′ 30 Amp 3-Wire Dryer Cord
WX09X10018	4′ 30 Amp. 4-Wire Dryer Cord
WX09X10019	5′ 30 Amp. 4-Wire Dryer Cord
WX09X10020	6′ 30 Amp. 4-Wire Dryer Cord
WX08X10086	8′ Flexible Dryer Duct with 2 screw clamps
PM08X10085	8′ Flexible Dryer Duct with 2 screw clamps
WX8X73	8′ Flexible Dryer Duct w/ 2 tension clamps
PM8X73	8′ Flexible Dryer Duct w/ 2 tension clamps, retail kit
WX08X10130-100PK	4″ Dryer Tension Clamp
WX08X10131-50PK	4″ Dryer Screw Clamp
WX8X74	50′ Dryer Duct
PM08X10078	Dryer Vent Close Elbow - turns 90° within 4″
PM8X85	Universal Outdoor Dryer Exhaust
WE01X25160	Drying Rack
WE49X22606	Rear Exhaust Opening Cover

*Accessories sold separately.

Dryer exhausting information – use metal duct only vertical and horizontal ducting.

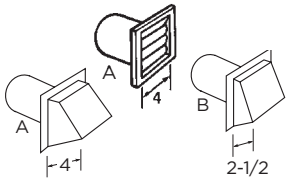

For every extra 90° elbow, reduce the allowable vent system length by 10 ft.

Two 45° elbows will be treated like one 90° elbow.

For the side exhaust installations, add one 90° elbow to the chart.

When calculating the total vent system length, you must add all the straight portions and elbows of the system (including the transition duct).

Laundry Center length includes factory-installed elbow that does not impact vent length.

Domestic dryer models	Number of 90° turns	Best performance: Maximum length of 4" dia rigid metal duct — Exhaust hood type: A 4" opening	Best performance: Maximum length of 4" dia rigid metal duct — Exhaust hood type: B 2-1/2" opening
Long Vent 6.0 - 8.0 cu. ft. capacity electric & gas dryers (HTX26–)	0	120 ft.	90 ft.
	1	100 ft.	75 ft.
	2	85 ft.	65 ft.
	3	70 ft.	55 ft.
	4	60 ft.	45 ft.
	5	55 ft.	35 ft.

Hotpoint® 6.2 Cu. Ft. Capacity Electric Dryer with up to 120 Ft. Venting and Shallow Depth

FEATURES AND BENEFITS

AutoDry – AutoDry monitors the internal air temperature to determine the ideal drying time, protecting your garments from overdrying.

Powerful Venting & Flexible Installation – Powerful airflow offers long-lasting performance from lint build-up and offers venting solutions up to 120 feet for greater installation flexibility.

Large Diffuser for Even Drying – A large internal heat diffuser allows for warm air to evenly spread throughout your clothes during the cycle, making this the ideal dryer for large loads and bulky items.

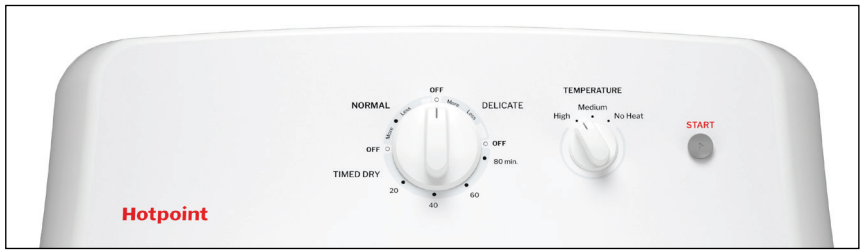

Durable Aluminized Drum – This durable, long-lasting design resists corrosion and optimizes drying performance.

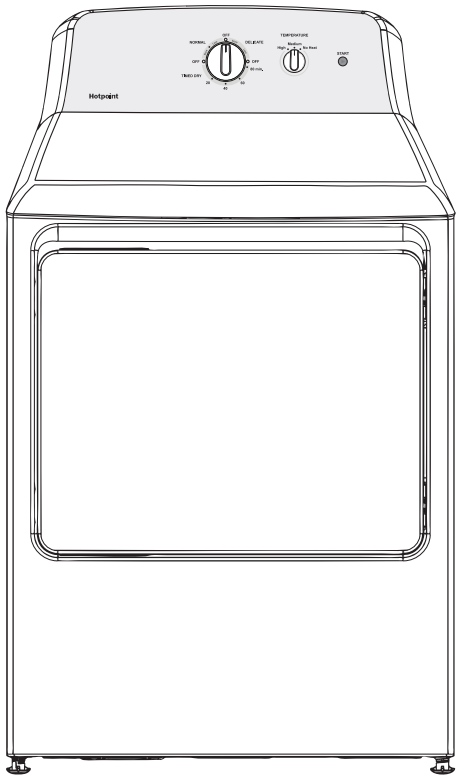

Reversible Dryer Door – Door can swing from either direction, making it easier to access the last sock from the back of the drum.

Shallow Depth Design – Reaching into your dryer is easier than ever thanks to the shallow depth design, which also fits into more spaces without sacrificing capacity.

Up-Front Lint Filter – Simplify the task of lint removal with our convenient upfront lint filter, enhancing airflow within the appliance and for your garments.

COMPATIBLE WASHER:
HTW265ASWWW – Hotpoint® 4.0 cu. ft. Capacity Washer with Stainless Steel Basket, Cold Plus and Water Level Control.
