GE Profile™ 4.8 cu. ft. Capacity UltraFast Combo with Ventless Heat Pump Technology Washer/Dryer

FEATURES AND BENEFITS

2-in-1 Washer/Dryer - Wash & Dry a large load of laundry in about 2 hours without the hassle of transferring clothes from the washer to the dryer.*

High-Airflow Ventless Drying System - Recirculated high-speed filtered airflow lets you gently dry activewear, denim and other delicate items so you don't have to hang dry.

Easy Installation & Space-Saving Solutions - Rethink your laundry space and location with a 120V, all-in-one Ventless Combo design that takes up half the space of two separate units.

Greater Energy Savings -** 50% more energy efficient drying** with Ventless Heat Pump.

Adaptive SmartDispense™ Technology - Save time and effort with an intelligent dispenser that holds enough detergent and softener for up to 32 loads. Plus, scan the barcode on the detergent or softener bottle with the SmartHQ™ app and the washer will dispense the right amount based on the type of product used.

Pet Hair Removal - Offers a unique, sustainable solution for pet hair removal. By using filtered high-speed air before the wash cycle, the Combo requires 65%* less water and 50%* less energy than other laundry systems, as it effectively vacuums and captures dry pet hair in the EZ Access two-stage lint filter.

Microban® Antimicrobial Technology - Provides antimicrobial protection on the gasket, dispenser, and draining system, to help prevent odors and ensuring your Combo stays fresh and clean load after load.

Smart Features Powered by SmartHQ™ - When connected to the SmartHQ™ app, the Combo allows you to select detergents, download specialty cycles, receive cycle status notifications, and initiate updates.

Large Wash Capacity - Large, 4.8-cu.-ft. capacity lets you clean large sized loads, even clean a king-size comforter.

Limited Warranty - Rest assured knowing your unit is backed by a 10-year limited warranty on the motor and a 5-year limited warranty on the sealed drying system.

EZ Access Lint Filter System - An exclusive, easy-to-reach lint filter system allows you to remove lint and micro particles, ensuring your Combo operates at the highest levels of efficiency.

Sanitize with Oxi - Remove 99% of bacteria with a dedicated cycle that uses an Oxi additive to boost your detergent's cleaning power, while keeping fabrics looking and feeling their best.

Eco Cool™ Cycle - Save energy with a specially designed cold-water wash and efficient Dry cycle that delivers comparable cleaning performance to the normal warm water wash cycle.

My Setting - Store preferred wash and dry cycle settings for later use, maximize time and alleviate adjusting cycle preferences with every load. Cycle preferences are stored, selected and deselected with a touch of a button; a heart symbol appears to indicate the setting has been stored and in-use.

Dewrinkle - Dewrinkle helps save time by minimizing ironing. If clothes are slightly wrinkled from sitting in the dryer too long, this setting helps remove wrinkles from 1-8 garments with steam vapor for approximately 35 minutes during the dry cycle.

Wrinkle Care - Prevents wrinkles by extending the tumble without heat.

GE APPLIANCES

ADA COMPLIANT

ENERGY STAR

* Based on completing the Normal Wash + Dry cycle with Eco Dry on using a 10-lb. DOE or Mixed Load in about 2 hours. See Use & Care Manual for details.

** Efficiency rating as compared to the requirements for ENERGY STAR qualification for standard electric dryers.
