Congratulations on your new GE Profile Combo !

What to expect when using your Combo

No load transfer! Start a load before work, before you go to bed...or anytime.

- When you choose WASH + DRY, your work is done. The Combo will wash and then gently dry your garments in just a couple hours. Finally, laundry is **One & Done**.

Clothes may feel a little damp when the dry cycle ends, but they're actually dry.

- Because your Combo dries clothes at low heat in a sealed drum, they may feel slightly damp or cool on first touch. Just take them out & shake them and they will feel dry in a few seconds.

Wash + Dry a load in just a couple hours. Times may adjust before & during cycles.

- Your Combo learns your load patterns, fabric types and habits. You may notice that the total cycle time will adjust during a cycle and from load to load based on load size, soil level and spin out after wash.

Easy access dual-stage lint filter ensures high efficiency airflow.

- Recirculating filtered, high speed air-flow allows the Combo to deliver great drying performance. You'll notice that less lint is generated through air tumbling versus standard dryers. Look for reminders to clean the filter.

Simple to use with plenty of options! Explore all the features.

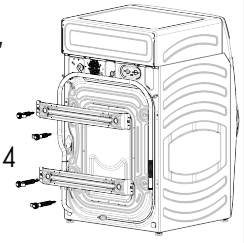

Don't mess with detergent & softener: **SmartDispense**.
Start the Combo from your phone: **Remote Start.**
Increase dryness level of your laundry: **More Dry**.
Reduce wrinkles at end of cycle: **Wrinkle Care**.
¿No hablas inglés? : Cambiar **Language** en el **Menu.**
Toss in a dryer sheet: **Wash Complete** tells you when.

How do I get started ?

A Remove shipping bolts, grommets & brace

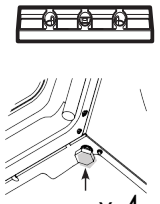

SHIPPING BOLTS

x 4

B Level the Combo by adjusting the four legs and locking the clench nuts.

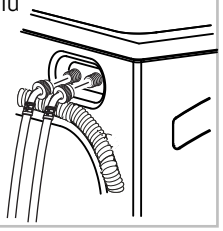

LEVEL LEGS

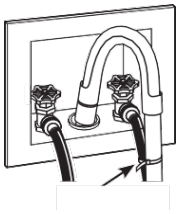

x 4

C Connect the hoses to the hot and cold water inlets.

WATER HOOK-UP

D Connect the proper hot and cold hoses to the faucets and insert the drain tube into the standpipe.

E A simple 120V outlet is all the Combo needs.
No 240V outlet needed !
No external venting !
It could go virtually anywhere.

F Connect the Combo using SmartHQ to your home wifi to enable updates & additional features.

Keep your Combo in top shape

UltraFast Combo: The Only Machine You Need.

Basic Operation of your Combo

1

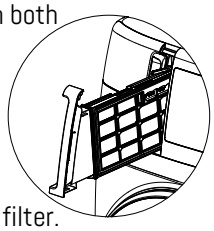

Power On the Combo & load it with sorted laundry items.

2

Check the filter on both sides.

To get the best drying efficiency, it's important to start with a clean filter.

3

Select a Wash + Dry cycle.

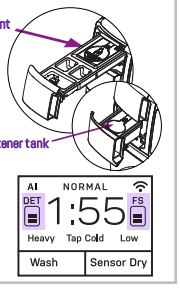

If desired, you can choose to run a Wash or Dry only.

WASH DRY

4

Manually dose or use SmartDispense after filling with detergent and/or softener. Choose other **Wash** and **Dry** Options as desired.

5

When ready, tap the Start / Pause button and let the Combo do both the washing & drying, thanks to no load transfer.

6

If desired, check the SmartHQ app on your phone for notifications, to adjust options, add more dry time or to learn more about the Combo.

Advanced Features of your Combo

Timed Dry
Switch from Sensor to Timed Dry and adjust time in 15 min increments.

My Settings
Profile

Downloaded Cycles
Use SmartHQ to add specialty cycles: Jeans; Air Fluff; Swimwear; or, PowerClean.

Wash Complete
WASH COMPLETE

Change Language
The Combo can provide messages & cycle info in English, Spanish or French.

Dewrinkle
Help remove wrinkles from 1-8 dry garments using steam vapor and a gentle tumble.

EcoCool™ Cycle
For a cold water clean equal to a Normal warm wash, try the EcoCool low energy cycle.

Display & Sound Settings
Adjust screen brightness and signal volume right from the Menu.

More Water
Add an extra 3 gallons of water for wash and each rinse at the touch of a button.

Remote & Delay Start
REMOTE START

Adaptive SmartDispense™
SMART DISPENSE

Eco Dry
From the Menu, turn Eco Dry mode ON to reduce the dryness level and use less total energy.

Cycle / Energy Monitoring
Use SmartHQ to get info on cycle history and energy usage.
