30 INCH FULLY INTEGRATED BUILT-IN BOTTOM-FREEZER REFRIGERATOR

BRFB1900FBI

Contemporary European Design

The hallmark of a high-end kitchen, this sleek built-in offers the ultimate in style, function, and creative customization. Featuring true-flush design, it integrates seamlessly with surrounding cabinetry. Intelligent features include hidden hinges, full door height with no exposed venting, front-end leveling for the back feet, a durable metal freezer drawer, and 3-D door adjustment for perfect alignment. Choose a lustrous stainless finish or panel-ready alternatives that let you custom match your cabinets. Interior theatrical LED lighting brilliantly illuminates every corner while conserving energy. Large, easy-to-read digital display puts complete control within easy reach.

In Harmony with Nature

Blomberg understands living well also means living intelligently and responsibly. It's a distinction that earned us the ENERGY STAR® 2017 Partner of the Year award. Featuring innovative technology that safeguards your food and ensures maximum freshness, our ENERGY STAR certified refrigerators also conserve energy, save money, and help protect the planet. The ultimate in eco-friendly engineering, Blomberg refrigerators are built with 99.9% lead-free materials, 100% free from ozone-depleting greenhouse gases, and manufactured with 85% recyclable components.

In Harmony with Your Life

Duo-Cycle Cooling

Ingenious Blomberg refrigerators are equipped with advanced multi-cycle, no-frost, silent cooling technology. Independently zoned and controlled cooling systems maintain even air temperature and humidity in separate freezer and fresh-food compartments, delivering enhanced food preservation and maximum energy efficiency. No air transfer between compartments means food in the freezer section freezes faster, items in the refrigerator stay fresher longer, and odors don't circulate.

Blue Light Technology

Exclusive Blomberg Blue Light Technology represents a breakthrough in keeping fruits and vegetables fresh and juicy long after they're picked. Continuous blue light rays illuminate the crisper and allow the natural process of photosynthesis to continue, prolonging storage life and preserving natural flavors, colors, textures, and nutrients.

IonFresh

This exceptional Blomberg technology simulates a natural process to bring pure freshness to your kitchen. By producing negative ions inside the refrigerator, Ion Fresh captures and neutralizes airborne bacteria, odor-causing microbes, and ethylene gas, extending the life of fresh fruits and vegetables and keeping circulated air clean and fresh smelling.

90-degree Flush Hinge

For a truly custom look, Blomberg's specially engineered hinge allows the refrigerator door to open a full 90 degrees and stay exactly flush with the opening.
