G	Depth when drawer is fully opened	36 1/16" (916.2 mm)
H	Depth when door is fully opened	48 5/8" (1 235.9 mm)

CLEARANCE

1. Minimum
2. Minimum clearance to left/right wall
3. Maximum depth for cabinets above countertops
4. Front edge of the range side panel forward from cabinet
5. To cabinet below cooktop and at the range back

Gas Pipe and Electrical Outlet Locations

Vetilation

Do not locate your range where it may be subject to strong drafts. Any openings in the floor or wall behind the range should be sealed. Make sure the openings around the base of the range that supply fresh air for combustion and ventilation are not blocked by carpeting or woodwork.

• This appliance must not be installed with a ventilation system that blows air downward toward the range. This type of ventilation system may cause ignition and combustion problems

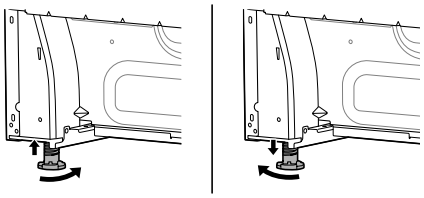

Dimensions and Clearances

Provide enough clearance between the cooktop and adjacent combustible surfaces. These dimensions must be met for safe use of your cooktop.

The location of the electrical outlet and pipe opening may be adjusted to meet specific requirements. The cooktop must be placed with at least 2 3/4" of clearance to the back wall.

Leveling the Range

Level the range by adjusting the leveling legs with a wrench. Extending the legs slightly may also make it easier to insert the rear leg into the anti tip braket.
