Café™ 30" Smart Slide-In Front-Control Induction and Convection Range with Warming Drawer

CHS90XP2MS1

FEATURES & BENEFITS

Harness a sense of control - Turn any pan into a smart pan and automatically maintain a set temperature within one degree, thanks to a cooktop sensor that gives you total control from either the display or your smartphone

You've got an eye for perfect timing - Monitor the progress of time-sensitive dishes without needing to open the oven door, with an in-oven camera that provides an interior view of cooking food visible from your smartphone

An attractive appearance at all times - Every detail of your kitchen is designed to delight, thanks to a sleek backlit glass touch control panel that visually disappears when not in use and wakes up when prompted

Enjoy total control in the kitchen and beyond - Control your oven with your smart device or simply your voice using WiFi Connect

The perfect combination of power & precision - Stun guests by showing off your 11" 3,700-watt induction element, which uses chef-preferred induction cooktop technology to deliver precise heat to cookware only. That means you can do everything from boiling a quart of water in 101 seconds to melting butter at exact temperatures with amazing efficiency.

Precise control for flawless results - Delight guests with the precision of sous vide cooking or perfectly prepared fondues and delicate sauces using a precision cooking probe that is sold separately

Ensure consistent temperatures across a large area - Evenly heat large griddles or enamel cookware across two 8" synchronized elements

DIMENSIONS

Receptacle Locations: Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Note: This appliance has been approved for 0" spacing to adjacent surfaces above the cooktop. However, a 6" minimum spacing to surfaces less than 15" above the cooktop and adjacent cabinet is recommended to reduce exposure to steam, grease splatter and heat.

Installation Information: Before installing, consult installation instructions for current dimensional data and additional requirements.
