PTD7000BN/FN/SN

GE Profile™ 30" Smart Built-In Convection Double Wall Oven with Air Fry and Precision Cooking

DIMENSIONS AND INSTALLATION INFORMATION (IN INCHES)

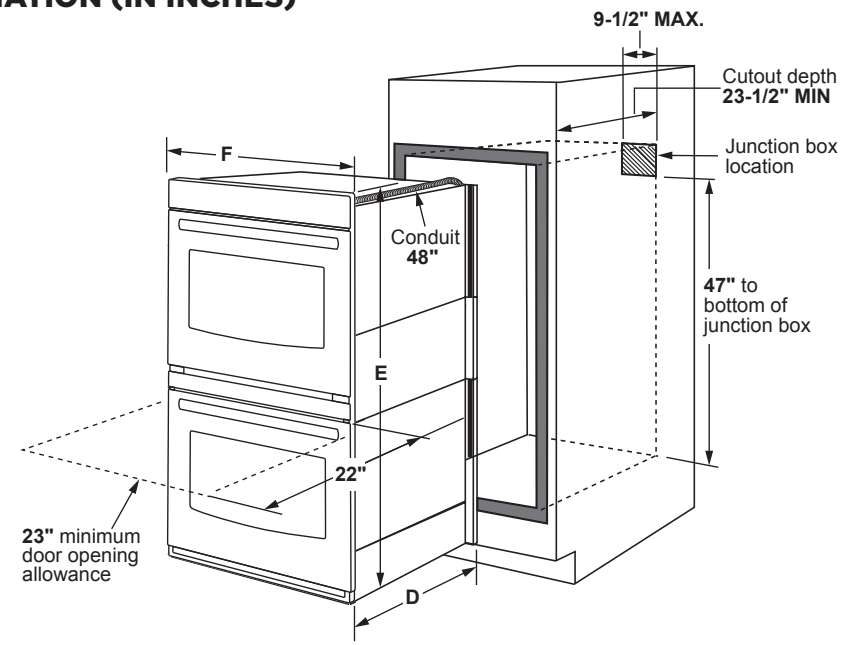

NOTE: Wall coverings, countertops and cabinets surrounding the wall oven must be able to withstand a temperature of up to 200°F (94°C).

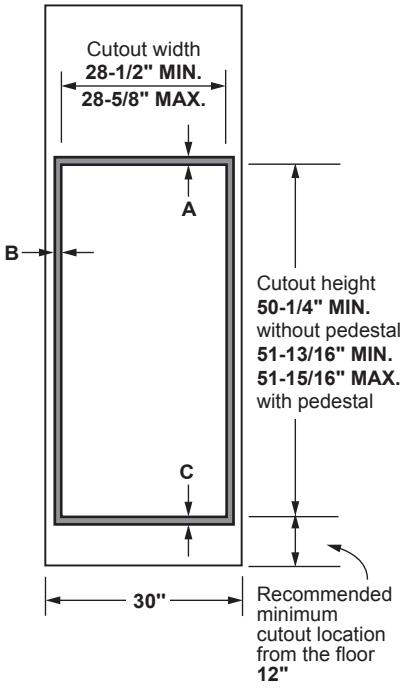

NOTE: If the cabinet in which the wall oven is installed does not have a solid bottom, two braces or runners must be installed to support the weight of the oven. The runners and braces must support up to 400 lbs (181 kg).

NOTE: Door handle protrudes 3" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

ATTENTION INSTALLER: Electric wall ovens are NOT approved for installation with a plug and receptacle. They must be hard wired into an approved junction box.

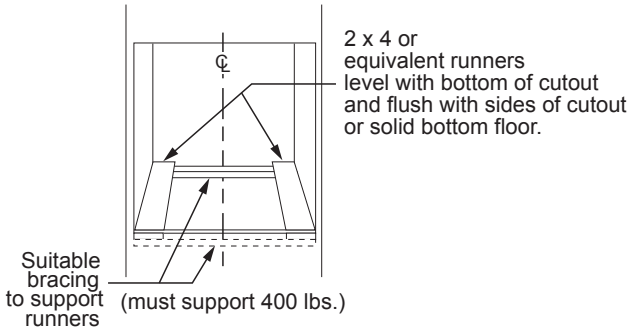

IMPORTANT: Before installing, consult installation instructions packed with product for current dimensional data.

Dimension and installation information are shown in inches.

GE Profile™ 30" Smart Built-In Convection Double Wall Oven with Air Fry and Precision Cooking

DIMENSIONS AND INSTALLATION INFORMATION (IN INCHES)

NOTE: 30" Double electric wall ovens are approved for installation above 27" and 30" warming drawers.

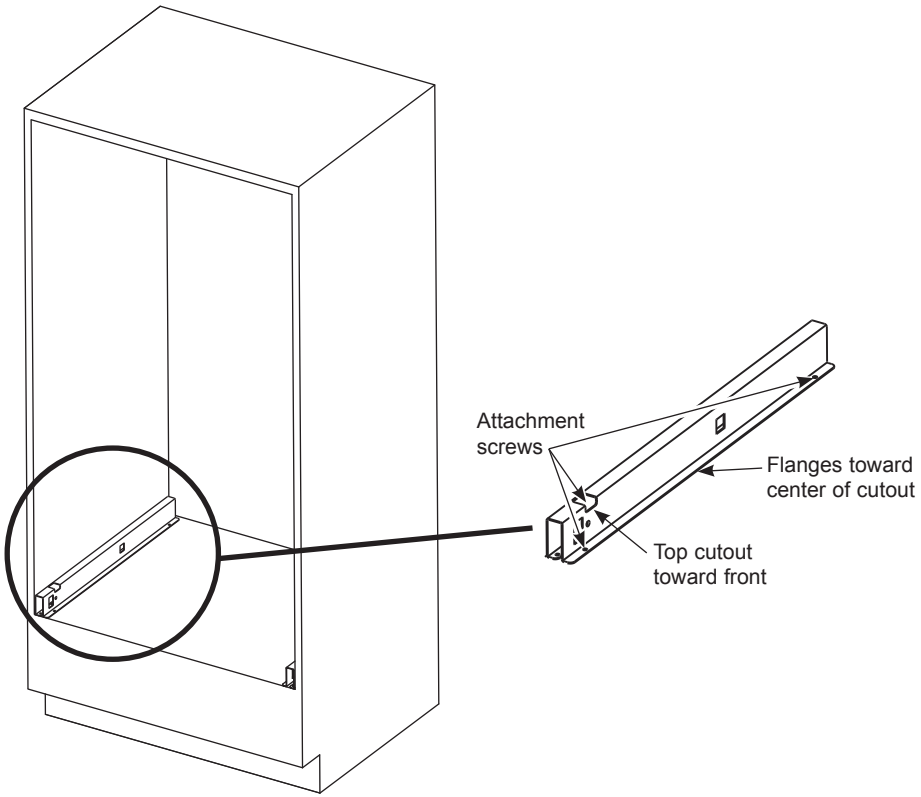

ATTENTION INSTALLER: Electric wall ovens are NOT approved for installation with a plug and receptacle. They must be hard wired into an approved junction box.

IMPORTANT: Before installing, consult installation instructions packed with ALL products for current dimensional and combination data.

WHEN TO USE THE PEDESTAL RAILS: When replacing an older GE Appliances 30" double wall oven with a new GE Appliances model. Cutout Height = 51-13/16" to 51-15/16". This is our traditional cutout height.

WHEN NOT TO USE THE PEDESTAL RAILS: When replacing a 30" double wall oven from another manufacturer (ie; Whirlpool) with a new GE Appliances model. Cutout height = 50-1/4". You will need to verify that the existing cutout matches the 50-1/4" dimension.

If the new GE Appliances 30" double wall oven is being installed into new construction (ie; not a replacement), then the recommended installation is to use the pedestal rails.
