⚠ WARNING!

You must follow these guidelines to ensure that your appliance's safety mechanisms are operating correctly.

1.3 Safety definitions

⚠

This is the safety alert symbol. It is used to alert of potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

⚠ DANGER

DANGER indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

⚠ WARNING!

WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

⚠ CAUTION!

CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

➔ IMPORTANT

IMPORTANT indicates installation, operation or maintenance information which is important but not hazard-related.

1.4 Child safety

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Destroy or recycle the carton, plastic bags, and any exterior wrapping material immediately after the appliance is unpacked. Children should never use these items to play. Cartons covered with rugs, bedspreads, plastic sheets or stretch wrap may become airtight chambers, and can quickly cause suffocation.

1.5 Important safety instructions

⚠ DANGER

DANGER Risk of fire or explosion. Flammable refrigerant used. Do not use mechanical devices to defrost the appliance. Do not puncture refrigerant tubing.
DANGER Risk of fire or explosion. Flammable refrigerant used. To be repaired only by trained service personnel. Use only manufacturer-authorized service parts. Any repair equipment used must be designed for flammable refrigerants. Follow all manufacturer repair instructions. Do not puncture refrigerant tubing.

⚠ CAUTION!

CAUTION Risk of fire or explosion due to puncture of refrigerant tubing. Follow handling instructions carefully. Flammable refrigerant used.

This appliance is for storage only and should not be used for any other purpose.
Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
Do not operate the appliance in the presence of explosive fumes
Avoid contact with any moving parts of automatic ice maker.
Remove all staples from the carton. Staples can cause severe cuts, and also destroy finishes if they come in contact with other appliances or furniture.

⚠ WARNING!

Do not use electrical appliances inside the food storage compartments of the appliance unless they are of the type recommended by the manufacturer.

⚠ WARNING!

WARNING! Cancer and Reproductive Harm http://www.P65Warnings.ca.gov

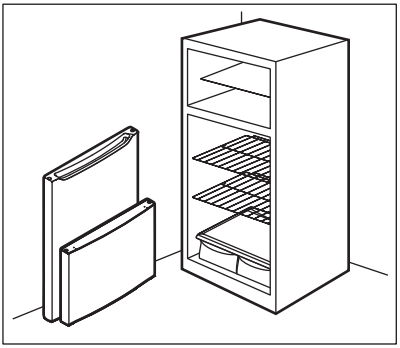

1.6 Proper disposal of your appliance

⚠ CAUTION!

CAUTION Risk of fire or explosion. Dispose of the appliance properly in accordance with the applicable federal or local regulations. Flammable refrigerant used.

Risk of child entrapment
Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous – even if they will sit for “just a few days”. If you are getting rid of your old appliance, follow the instructions below to help prevent accidents.
We strongly encourage responsible appliance recycling/disposal methods. Check with your utility company or visit http://www.energystar.gov/recycle for more information on recycling your old appliance.
Before you throw away your old appliance:

- Remove doors.
- Leave shelves in place so children may not easily climb inside.
- Have it removed by a qualified service technician.

1.7 Electrical information

- The appliance must be plugged into its own dedicated 115 Volt, 60 Hz., 15 Amp, AC only electrical outlet. The power cord of the appliance is equipped with a three-prong grounding plug for your protection against electrical shock hazards. It must be plugged directly into a properly grounded three-prong receptacle. The receptacle must be installed in accordance with local codes and ordinances. Consult a qualified electrician. Do not use an extension cord or adapter plug.

⚠ WARNING!

Avoid fire hazard or electric shock.

- If the power cord is damaged, it should be replaced by an authorized service technician to prevent any risk.
- Never unplug the appliance by pulling on the power cord. Always grip the plug firmly, and pull straight out from the receptacle to prevent damaging the power cord.

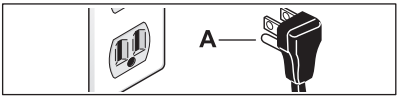

- Unplug the appliance before cleaning and before replacing the AC LED light bulb to avoid electrical shock. Use only a 5-watt or less AC LED light bulb.
- Performance may be affected if the voltage varies by 10% or more. Operating the appliance with insufficient power can damage the compressor. Such damage is not covered under your warranty.
- Do not plug the unit into an electrical outlet controlled by a wall switch or pull cord to prevent the appliance from being turned off accidentally.
- Do not pinch, knot, or bend the power cord in any manner.

⚠ WARNING!

When positioning the appliance, ensure the supply cord is not trapped or damaged.
Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.

⚠ WARNING!

Do not, under any circumstances, cut, remove, or bypass the grounding prong (A). Always use the power cord with a three-prong grounded plug and grounding type wall receptacle.

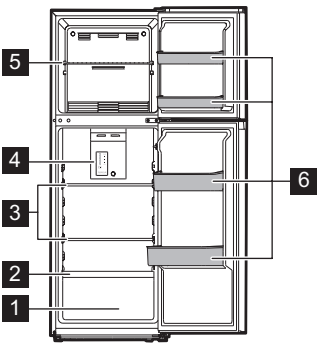

2. FEATURES

➔ IMPORTANT

*Features may vary by model.
Accessories are available for your appliance and may be purchased at Frigidaire.com or by calling toll-free 1-800-374-4432.

2.1 Product overview

1. Crisper
2. Crisper Cover
3. Full Shelves
4. Refrigerator Control
5. Freezer Shelf
6. Fixed Door Bins

3. INSTALLATION

This User Manual provides general installation and operating instructions for your model. We recommend using a service or kitchen contracting professional

to install your appliance. Use the appliance only as instructed in this User Manual. Before starting the appliance, follow these important first steps.

3.1 ✓ Installation Checklist

Doors

- ❒ Refrigerator door seals completely to the cabinet on all sides
- ❒ Freezer door is level from side to side across the top

Leveling

- ❒ Appliance is level side-to-side and tilted 1/4" (6 mm) front-to-back
- ❒ Cabinet is setting solid on all corners
- ❒ Anti-tip bracket set in front on both sides

Electrical Power

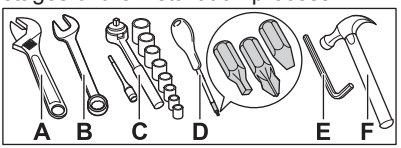

- ❒ House power is turned on
- ❒ Appliance is plugged in

Final Checks

- ❒ Shipping material is removed
- ❒ Refrigerator and freezer temperatures are set
- ❒ Registration card is sent in

3.2 Tools necessary

These tools are necessary at different stages of the installation process:

A. Adjustable Wrench
B. Fixed Wrench: 5/16"
C. Socket Wrench: Set
D. Screwdriver: Multi-bit with #2 Square Bit and Flat Head
E. 6 mm Allen Wrench
F. Hammer (some models)

3.3 Cleaning the appliance

➔ IMPORTANT

Remove tape and glue residue from surfaces before turning the appliance on. Rub a small amount of liquid dish soap over the adhesive with your fingers. Rinse with warm water and dry with a soft cloth.
Do not use sharp instruments, rubbing alcohol, flammable fluids, or abrasive cleaners to remove tape or glue. These products can damage the surface of the appliance.
After you remove all of the package materials, clean the inside of the appliance before using it. Refer to Care and Cleaning.

3.4 Moving the appliance

➔ IMPORTANT

The appliance is heavy. When moving the appliance for cleaning or service, raise the anti-tip bracket (refer to Setting the anti-tip brackets). Be sure to cover the floor with cardboard or hardboard to avoid floor damage. Always pull the appliance straight out when moving it. Do not wiggle or “walk” the appliance when trying to move it as you could damage the floor.

3.5 Location

- If possible, place the appliance out of direct sunlight and away from the range, dishwasher, or other heat sources.
- The appliance must be installed on a floor that is level and strong enough to support a fully loaded appliance.

⚠ WARNING!

This appliance is intended for use in residential household and similar interior applications such as:

- Kitchen / kitchenette
- Pantry room
- Basement
- Enclosed garage
- Other interior residential type environments

⚠ CAUTION!

Do not install the appliance where the temperature will drop below 45°F (7°C) or rise above 110 °F (43 °C). The compressor will not be able to maintain proper temperatures inside the appliance.

NOTE

Do not block the lower front of the appliance.
Sufficient air circulation is essential for the proper operation of the appliance.

⚠ WARNING!

Allow the following clearances for ease of installation, proper air circulation, plumbing, and electrical connections:

- Top 3/8" (9.5 mm)
- Sides 3/8" (9.5 mm)
- Back 1" (25.4 mm)

NOTE

If you place the appliance with the door hinge side against a wall, you may have to allow additional space so the door can be open wider.

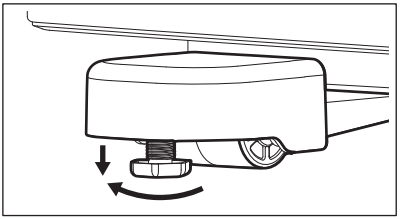

3.6 Cabinet leveling and door alignment

Guidelines for final positioning of appliance:

- All 4 corners of the cabinet must rest firmly on the floor.
- The cabinet should be level at the front and rear.
- The sides should tilt 1/4" (6 mm) from front to back to ensure that doors close and seal properly.
- Align the doors with each other and level them.

3.7 Setting the anti-tip brackets

The anti-tip brackets are located on the lower front corners of the cabinet. Lower the anti-tip brackets on each side clockwise until they contact the floor. Do not raise the cabinet.

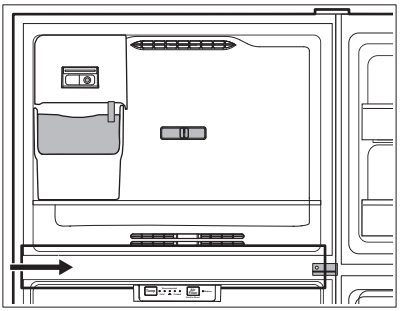

NOTE

The anti-tip bracket must be installed according to the instructions in the User Manual. Failure to do so may result in injury.

3.8 Mullion

When you first turn on the appliance, the mullion might be warm to the touch for the first 24 hours of operation. This is normal.

4. DOOR REMOVAL

4.1 Door Removal/Reversal

⚠ CAUTION!

Before you begin, remove the electrical power cord from the wall outlet. Remove any food from door shelves.

NOTE

Reversing the door swing should be performed by a qualified person.

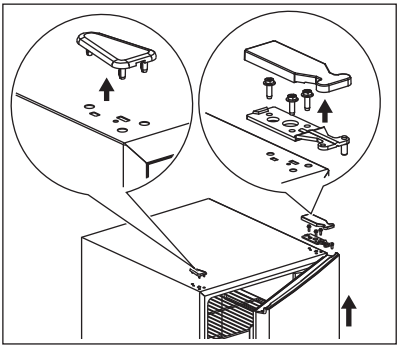

NOTE

Do not use an electric tool to unscrew and screw parts.

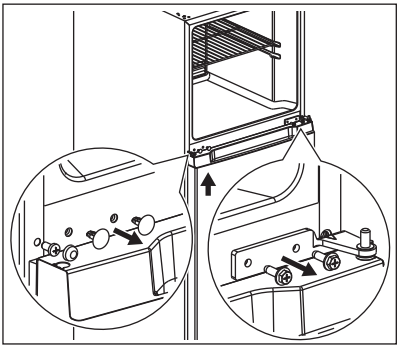

⚠ CAUTION!

If you place the appliance on its back or side, let it stand upright for 6 hours before you plug it in. This prevents damage to internal components.

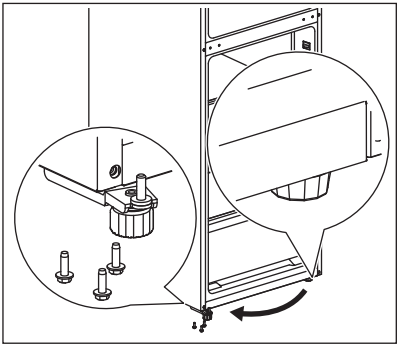

1. Fix the door using tape.
2. Remove the hole cover, upper hinge cover, screws, upper hinge, and hinge pin. Lift the freezer door to detach it from the cabinet.

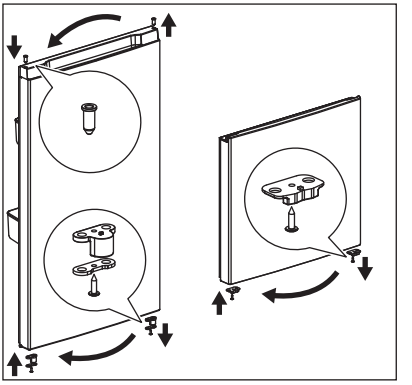

3. Unscrew the center hinge. Remove the screw covers and screw on the opposite side. Detach the refrigerator door from the cabinet.

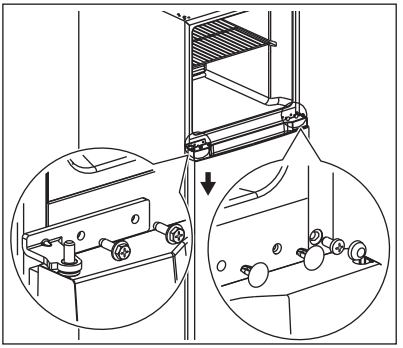

4. Remove the adjusting feet, and unscrew the lower hinge. Install them on the opposite sides.

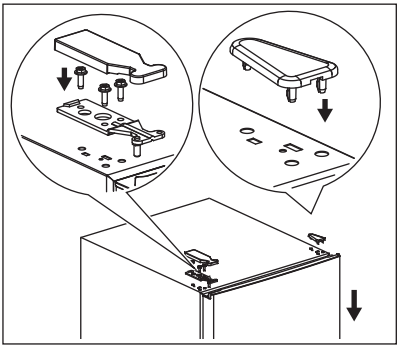

5. Unscrew the limit blocks from both doors, then install them on the other side. Install hinge pin on the upper cover of the refrigerator door.

6. Install refrigerator door on the lower hinge. Install the middle hinge and screw covers.

7. Install the freezer door on the middle hinge, then install the upper hinge, hinge cover and hole cover.

5. CONTROLS AND SETTINGS

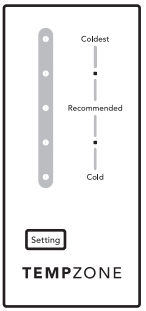

5.1 Cool down period

To ensure safe food storage, allow the appliance to operate with the doors closed for at least 8 hours before loading it with food.

NOTE

When first turning the appliance on, adjust the control to Recommended. After 24 hours, adjust the controls as needed.

5.2 Refrigerator Temperature Control

Temperature adjustment

Adjust the temperature gradually: adjust in small increments, allowing the temperature to stabilize.

- For colder temperatures, press the Setting button to change the temperature setting toward Coldest.
- For warmer temperatures, press the Setting button to change the temperature setting toward Cold.

NOTE

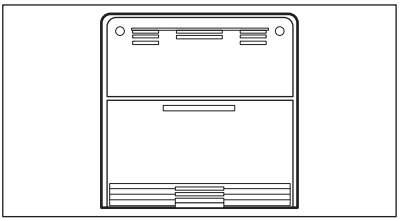

Pressing the Temp button scrolls through the 5 temperature settings toward the coldest setting, and then loop back to the least coldest setting.

Adjusting the refrigerator control changes temperature in both compartments. The freezer control can be left at the factory preset (Recommended) or adjusted as desired.

To maintain temperatures, a fan circulates air in the refrigerator and freezer compartments. For good circulation, do not block cold air vents with food items.

6. STORAGE FEATURES

6.1 Air Vents

Do not place items in front of the air vents as this impacts the temperature performance.

6.2 Door Storage

Door bins, shelves, and racks conveniently store jars, bottles, and cans. You can quickly select frequently used items.

6.3 Door Bin

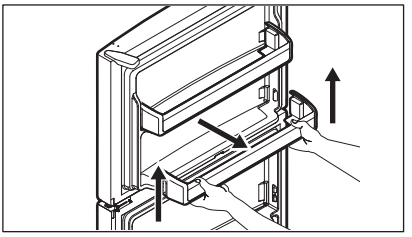

Door bins can accommodate gallon-sized plastic drink containers and economy-sized jars and containers.

To remove the door bin:

1. Lift up the bin.
2. Pull it straight out.

To install the door bin:

1. Push the bin back and down into the locking tabs.
2. The bin sides will lock into the tabs.

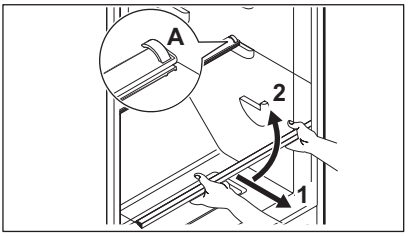

6.4 Shelf adjustment

Adjust the shelves to suit individual needs. Before adjusting the shelves, remove all food.

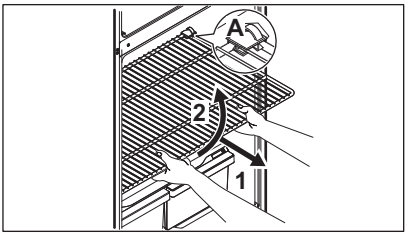

To adjust shelves, slide the shelf by moving it forward and lifting it upward.

To replace shelves, insert the rear of the shelf into any pair of shelf rails and carefully push the shelf back into position, making sure the shelf clips (A) go in the notch in the liner.

Glass Shelf

Wire Shelf

⚠ CAUTION!

When reinstalling the shelf, ensure the shelf clip is attached to the liner and holds it in place.

⚠ CAUTION!

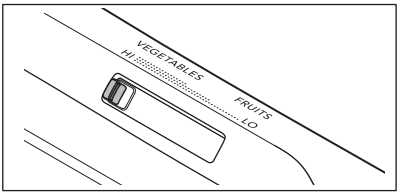

Do not clean glass shelves or covers with warm water when they are cold. Shelves and covers may break if exposed to sudden temperature changes or impact, such as bumping. Tempered glass is designed to shatter into many small, pebble-size pieces. This is normal. Glass shelves and covers are heavy. Use both hands when removing them to avoid dropping.

NOTE

To avoid personal injury or property damage, handle tempered glass shelves carefully. Shelves may break suddenly if nicked, scratched, or exposed to sudden temperature change.

6.5 Crisper Humidity Control (some models)

The crisper humidity control, present on the crisper drawers of some models, allows you to adjust the humidity within the crisper. This can extend the life of fresh vegetables that keep best in high humidity.

IMPORTANT

Store vegetables and/or fruit in the crisper drawers.

NOTE

Leafy vegetables keep best when stored with the humidity control set on high humidity, or in a drawer without a humidity control. This keeps incoming air to a minimum and maintains maximum moisture content. Store non-leafy vegetables and fruits still in their skins at the low humidity setting.

7. NORMAL OPERATING SOUNDS

7.1 Understanding the sounds you may hear

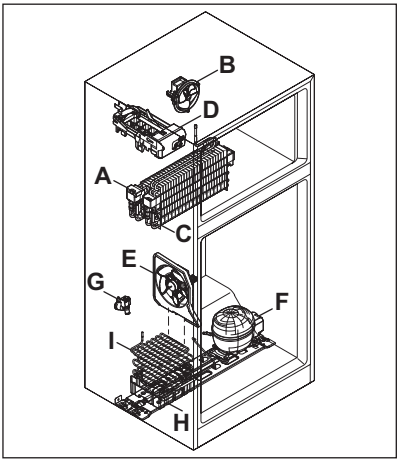

Your new, high-efficiency appliance may introduce unfamiliar sounds. These sounds normally indicate your appliance is operating correctly. Some surfaces on floors, walls, and kitchen cabinets may make these sounds more noticeable.

NOTE

Energy efficient foam in your appliance is not a sound insulator.

Following is a list of major components in your appliance and the sounds they can cause:

A. Evaporator. Refrigerant through the evaporator may create a boiling or gurgling sound.
B. Evaporator fan. You may hear air being forced through the refrigerator by the evaporator fan.
C. Defrost heater. During defrost cycles, water dripping onto the defrost heater may cause a hissing or sizzling sound. After defrosting, a popping sound may occur.
D. Condenser fan. You may hear air being forced through the condenser.
E. Compressor. Modern, high-efficiency compressors run much faster than previous models. The compressor may have a noticeable hum or pulsating sound during operation.
F. Drain pan (not removable). You may hear water dripping into the drain pan during the defrost cycle.
G. Condenser. May create minimal sounds from forced air.

NOTE

During automatic defrost cycle, a red glow in the back wall vents of your freezer compartment is normal.

8. CARE AND CLEANING

8.1 Protecting your investment

Keeping your appliance clean maintains its appearance and prevents odor build-up. Wipe up any spills immediately and clean the freezer and fresh food compartments at least twice a year. When cleaning, take the following precautions:

- Never use chloride or cleaners with bleach to clean stainless steel.
- Do not wash any removable parts in a dishwasher.
- Always unplug the electrical power cord from the wall outlet before cleaning.
- Do not remove the serial plate. Removal of your serial plate voids your warranty.
- Remove adhesive labels by hand. Do not use razor blades or other sharp instruments which can scratch the appliance surface.

Do not use abrasive cleaners such as window sprays, scouring cleansers, brushes, flammable fluids, cleaning waxes, concentrated detergents, bleaches or cleansers containing petroleum products on plastic parts, interior doors, gaskets or cabinet liners. Do not use paper towels, metallic scouring pads, or other abrasive cleaning materials or strong alkaline solutions.

Refer to the guide below for more details on caring and cleaning specific areas of your appliance.

NOTE

If you set your temperature controls to turn off cooling, power to lights and other electrical components will continue until you unplug the power cord from the wall outlet.

⚠ CAUTION!

Pull the appliance straight out to move it. Shifting it from side to side may damage flooring. Be careful not to move the appliance beyond the plumbing connections.

IMPORTANT

If you store or move your appliance in freezing temperatures, be sure to completely drain the water supply system. Failure to do so could result in water leaks when the appliance is put back into service. Contact a service representative to perform this operation.

8.2 Care & Cleaning Tips

Part	What to use	Tips and precautions
Interior and door liners	• Soap and water • Baking soda and water	Use 2 tablespoons of baking soda in 1 quart of warm water. Be sure to wring excess water out of sponge or cloth before cleaning around controls, light bulb or any electrical part.
Door gaskets	Soap and water	Wipe gaskets with a clean soft cloth.
Drawers and bins	Soap and water	Use a soft cloth to clean drawer runners and tracks.
Glass shelves	• Soap and water • Glass cleaner • Mild liquid sprays	Allow glass to warm to room temperature before immersing in warm water.
