30" Full Depth Slide-In Gas Range

BGR30524SS

Key Features & Benefits

True European Convection
True European Convection utilizes a dedicated heating element around the rear fan to circulate warm air evenly and consistently throughout the oven, allowing you to cook multiple dishes at once on different racks.

Auto Re-Ignition
The automatic re-ignition will automatically re-ignite an extinguished burner in case it is blown out accidentally by a draft, spill or boil-over. This will prevent build-up of gas above the cooktop and lowers the risk of gas leaks.

Continuous Cast Iron Grates
The continuous cast iron grates are designed perfectly to move and slide heavy pots and cookware around the cooking surface.

Interior Halogen Lighting
With a bright interior oven light, this oven ensures full visibility while baking, braising, and roasting.
